Large-width hexagon nut for steelwork

A large-width hexagon nut for steelwork, selected with the assembly specification and required documents.

DIN 6915

Dimensional range

M12-M30

Thread

Metric · coarse pitch

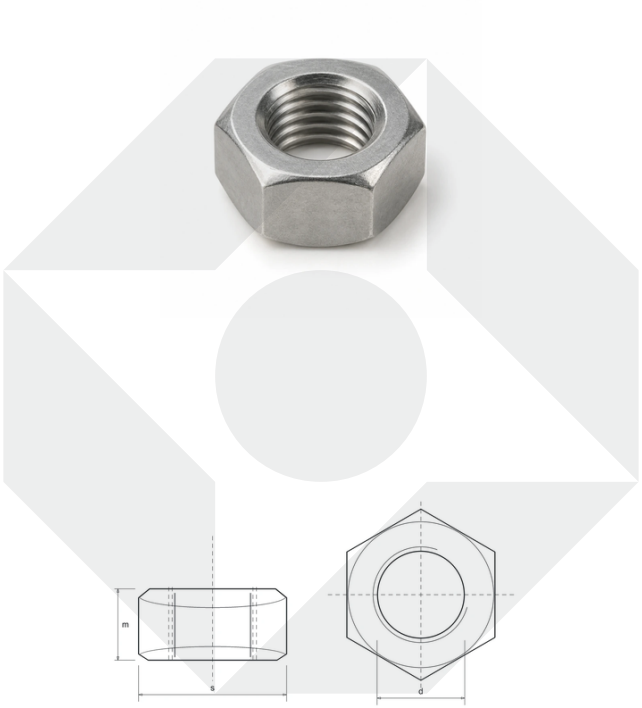

Configuration

Large-width hexagon nut for steelwork

Variants and dimensional data

Reference sizes are listed in the table. Other diameters, pitches, materials and finishes are available on request, subject to an agreed supply specification.

Dimensions in mm. Identification drawing, not a manufacturing drawing.

M	Pitch P	s	m
12	1.75	22	10
14	2	24	11
16	2	27	13
18	2.5	30	15
20	2.5	32	16
22	2.5	36	18
24	3	41	19
27	3	46	22
30	3.5	50	24

A single nut does not constitute a certified EN 14399 assembly. Do not mix structural assembly components without the verification required by the specification. Use the Structural Bolting section for complete assemblies.

Table dimensions refer to the stated execution. DIN/UNI, polymer and special variants require verification of their own dimensions; they do not automatically inherit reference geometry, weight or performance.

Materials, classes, finishes and treatments

Executions are distinguished by reference, material, class and finish. DIN, ISO and UNI references do not imply dimensional equivalence or availability of every size in each material. Supply and batch documents require quotation confirmation.

Execution reference	Material	Class / hardness	Documented finishes
DIN 6915	Steel	10	GEOMET 321A; Hot-dip galvanized; Plain; Yellow zinc plated; Zinc plated

“To be specified” is a requirement not established by this selection; it does not imply class 70/80, HV hardness or an automatic finish. Steel property classes do not apply to nylon/polyamide; PA6 and PA66 are distinguished only where stated. For nuts with non-metallic inserts, the material shown is the body material.

Documentation

Document	Status
Declaration of conformity	Subject to order agreement
Material certificate	Subject to order agreement
EN 10204 2.2 test report	Subject to order agreement
EN 10204 3.1 inspection certificate	Subject to order agreement
Dimensional inspection report	Subject to order agreement
Coating report	Subject to order agreement
Other documentation	Subject to order agreement

Batch documents are not automatically included: specify your requirements in the RFQ.

ISO, DIN and UNI: key differences

UNI 5713

Dimensions of the specified commercial selection do not replace a manufacturing drawing or the complete supply specification.

DIN 6915

Related reference; compare dimensions, design and mechanical specification before substitution. Exact equivalence is not claimed.
