Cylindrical cross clamps, open for wall fixing

Cylindrical cross clamps, open for wall fixing in AISI 316 stainless steel. Compare rope diameter, dimensions and configurations in the table.

Material

AISI 316 / A4

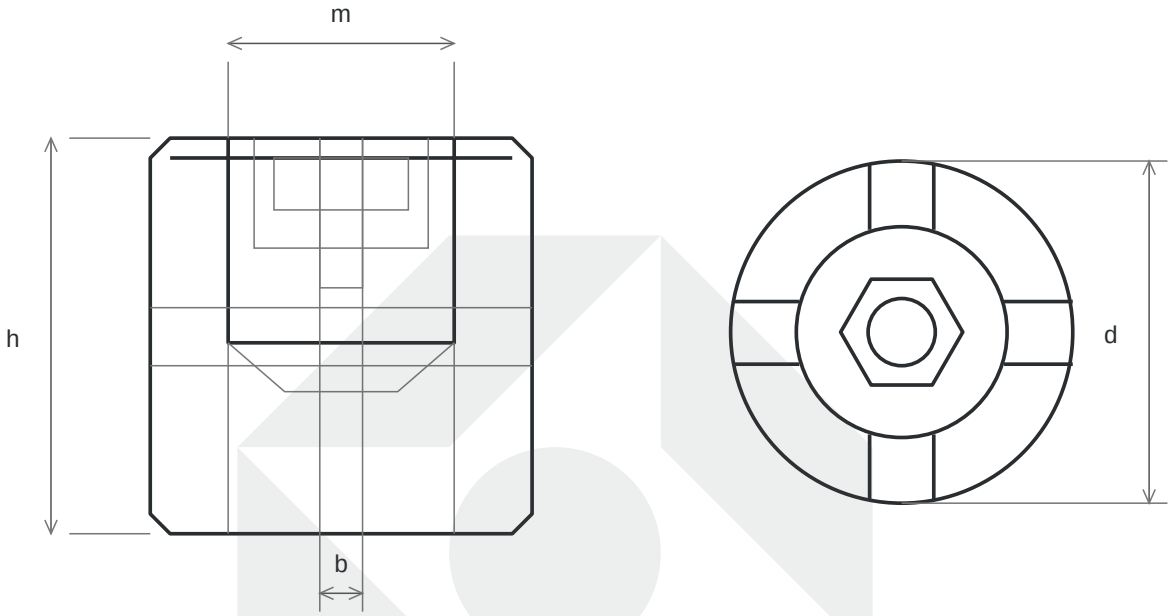

Variants and dimensions

Rope Ø (mm)	m thread	h (mm)	b (mm)	d (mm)	Set screw
3	M12	19	3,5	20	M12×10
4	M12	21	4,5	20	M12×10
5	M12	23	5,5	20	M12×10

Indicative dimensions, subject to production variations. The table does not establish a load rating for the clamp or assembly.

Technical drawing

Dimensions in mm, except metric thread M. Illustrative drawing, not to scale. Confirm dimensions and configuration in the enquiry. m: internal thread; h: overall height; b: passage width; d: outside diameter. Set screw: thread × length. Polished body with open bottom and through thread for wall connection. Original drawing dimension h1 is not tabulated and is not inferred. Verify fixing compatibility and assembly strength.
